

HUNT THE CODE

Event Description

Debugging is twice as hard as writing the code in the first place. Therefore, if you write the code as clearly as possible, you are, by definition, not smart enough to debug it.

Hunt the code is an offline programming event. Which tests yours logical, mathematical and basic programming skills given the input and output of a program, you have to figure out what the program does

Event Format:-

- ⦿ There are total two rounds both are offline.
- ⦿ First round is written where participants have to show their ability to analyze and fix the problems. It will consist some objective question from C, C++ and some input output problems.
- ⦿ In Final round shortlisted teams have to write code for given five exe or (input and output) by analyzing correct logic.

Event Rules:-

- ⦿ A team can have maximum 2 participants.
- ⦿ 3rd party library are not allowed participants have to use only provided libraries.
- ⦿ Judges Decision will be final.
- ⦿ Only C and C++ languages are allowed
